a. Composition groups and later profile projections

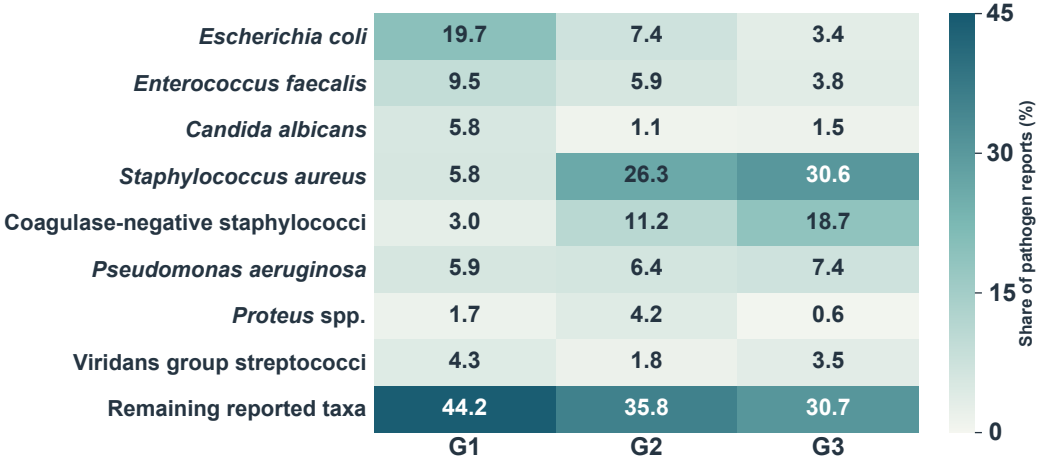

Composition groups

- **G1 Enteric and yeast enriched**
  Escherichia coli
  Enterococcus faecalis
  Candida albicans
- **G2 Mixed operative profile**
  Staphylococcus aureus
  Coagulase-negative staphylococci
  Mixed remaining taxa
- **G3 Pediatric staphylococcal**
  Cardiac and neurosurgical profiles
  S. aureus and coagulase-negative staphylococci prominent

b. Later organ/space involvement by source profile

c. Later pathogen composition of the frozen groups

d. Later methicillin resistance within *S. aureus*
